

Screen Printing REQUIREMENTS

Please Read the Below Information!!!

Sources:

SCREENPRINTING (Serigraphy)

Screen printing is a stencil method of print making in which a design is imposed on a screen of polyester or other fine mesh, with blank areas coated with an impermeable substance. Ink is forced into the mesh openings by the fill blade or squeegee and onto the printing surface during the squeegee stroke. It is also known as **silkscreen**, **serigraphy**, and **serigraph printing**. A number of screens can be used to produce a multi-coloured image.

We will be working in groups to create a tee-shirt design. Please bring an idea for a design that may work collaboratively with other's designs. Be ready to work as a team and BRING YOUR OWN SHIRT!!!
